

TERSOMR® WORRY FREE QUALITY ASSURANCE WARRANTY FOR WATERLOGGED SHOWER™ ESSENTIAL & NEW SHOWER PREVENTIVE

TERSOMR® stands behind our *Prestige Solution Systems* creating a barrier to block water and impurities from accessing the shower's substrate, which is our foundational belief in quality and craftsmanship that goes above and beyond the established industry standards.

TERSOMR® will address the current structural movement in the shower floor perimeters and corners. Based on our experience once showers have completely settled, our systems permanently neutralize the ongoing structural settling damage.

We can only guarantee our service satisfaction to the structure we completely fixed. However, overtime other structural parts may eventually need repairs. It is essential for homeowners to service the shower by purifying and applying sealer every two to three years to preserve the shower's surface. We recommend our *Preserve Solution System*. Additionally, we recommend to follow the shower surface care recommendations.

It is important for the client to know that TERSOMR® will guarantee the shower's repairs for a lifetime after either one of the *TERSOMR® ESSENTIAL or PREVENTIVE Prestige Solution Systems is completed*. Our main goal is to provide clients a world class experience in the usage of natural stone and porcelain in shower structures by establishing trust and warranty high quality services in New York City and North Jersey.
